

Yuri Pellegrini

Full-Stack Software Developer | GPU & Game Programming

Email: yuri.pellegrini@gmail.com

Phone: +39 3393028465

LinkedIn: linkedin.com/in/yuri-pellegrini

Address: Via Osoppo 20, Gradisca di Sedegliano, Italy

Nationality: Italian

Work Experience

Full-Stack and Machine Learning Developer | I-CON Soluzioni Digitali | 06/2025 - Present

- Migrated an EANN (Eigen Artificial Neural Network) algorithm from CPU to GPU using NVIDIA CUDA and C/C++, dramatically improving computation times.
- Developed and maintained complex web applications, neural-network-focused portals, and provided technical support.
- Technologies: C, C++, NVIDIA CUDA, Python, Laravel (PHP), Vue, Angular.

Software Developer Intern | Rubynetti | 11/2024 - 02/2025

- Contributed to the development of a complex web application using Test-Driven Development to ensure reliability.
- Technologies: Ruby on Rails, Docker, REST API integration, Stripe.

Software Development and IT Support Intern | CPUnit s.r.l. | 07/2016 - 07/2016

- Performed hardware repairs, system diagnostics, and developed internal-use software.

Software Developer Intern | Rhoss S.p.A. | 02/2015 - 03/2015

- Developed software for the company's customer area based on the MVC pattern.
- Technologies: C#.

Education

Bachelor's Degree in Computer Science | Ca' Foscari University of Venice | Ongoing

- Rewrote and optimized family-support applications in Android Studio using Java.
- Developed a university orientation management system using Python, Flask, and PostgreSQL.

Accelerated Computing in Modern CUDA C++ | NVIDIA | 03/2026

- GPU programming with CUDA, including code development and compilation, and CPU/GPU memory optimization.
- Used parallel algorithms, CUDA kernels, and concurrent streams to maximize performance.
- Integrated GPU hardware acceleration into existing C++ applications.
- Credential ID: w4vIgwUBS3iK81YM1IzEYw

Professional Game Development in C++ and Unreal Engine | Tom Looman Course (Remote) | 06/2024 - 08/2024

- Advanced component- and event-driven development using C++ and Blueprints in Unreal Engine 5.
- In-depth study of engine profiling and performance optimization techniques.
- Implemented UMG user interfaces based on event-driven principles.
- Credential ID: cert_ycx35qpn

Technical High School Diploma in Telecommunications (86/100) | I.S.I.S. "A. Malignani", Udine | 09/2012 - 07/2017

- Final project: Development of a Unity-based video game interfaced with an Arduino microcontroller.

Technical Skills

- **Programming Languages:** Strong knowledge of C++, C, and Java; intermediate knowledge of Python, C#, GDScript, TypeScript, and PHP; active interest in shader programming (HLSL/GLSL).
- **Game Development & 3D:** Unreal Engine 5 (C++ and Blueprint), Godot, Unity; mathematical foundations for 3D graphics.
- **GPU Profiling & Optimization:** Parallel algorithm optimization, CPU/GPU memory management, NVIDIA CUDA, advanced use of performance profiling tools (NVIDIA nsys, nvtop, gprof).
- **IT Tools & Other:** Git (GitHub/GitLab), Docker, MySQL, PostgreSQL, full-stack web development.
- **Languages:** Italian (native), English (advanced), Spanish (beginner).

Additional Information

- Good ability to explain complex technical concepts to team members to support problem-solving and debugging.
- Driving License: Category B.

I hereby authorize the processing of my personal data in accordance with Legislative Decree 196/2003 and GDPR 2016/679.
